

Name: _____

Mark: _____ / 100

Instructions

For this assignment, you will use the jQuery library and a "plug in" to create a carousel (also called a "slider" or "slideshow") on a Web page. You will need to properly link the jQuery library with a popular CDN, and also load the plugin library and properly configure your carousel. **Do not use the images supplied in class.**

Requirements

1. jQuery Library: Make sure that you are loading one of the popular CDN versions of jQuery.
2. Use a jQuery plugin of your choosing to create the carousel on your page.
3. Make sure the carousel is responsive so it will work properly on mobile.
4. Configure the carousel so that it is **different** in some way than the default settings.
5. Carousel must have a way to navigate between different slides, sometimes known as a "pager".

Submission Guidelines

Place your files together in a folder, and upload to the specified OneDrive share by the due date. Make sure you name your folder like so:

21129_WDF01_Assignment1(last_name, first_name)

*Code copied from other people, other sources, from course PDFs, or copied from in-class examples (**unless otherwise specified**) is plagiarism. Please refer to the "Academic Misconduct" section of your course outline.*

*Note: This assignment **will** require you to use some online code; the options/settings for your chosen slider/carousel.*

Due Date and Time:

Monday, February 14, at 11:59 p.m.

Marking Criteria

Marks for this project will be given as follows:

Criteria	Needs Work	Proficient	Excellent	Mark
jQuery CDN	The jQuery library is linked locally, or no jQuery present.	-nil-	jQuery is loading properly from an online CDN	
	0		20	/ 20
Marking Comments				
jQuery plugin	No plugin used.	-nil-	jQuery plugin used to create a carousel, or "slider" on a page.	
	0		20	/ 20
Marking Comments				
Carousel is Responsive	Carousel is not responsive	Carousel is responsive, but could be working better.	Carousel is responsive so that it works well on mobile as well as desktop layouts.	
	0	5-15	20	/ 20
Marking Comments				
Settings	All settings are default.	-nil-	At least one setting changed from default.	
	0		20	/ 20
Marking Comments				
Pager	No pager or navigation.	Pager is provided, but not working properly. Pager is provided and works, but CSS has not been used to properly style the pager so it is easy to use.	Pager set up, easy to use, and uses CSS to make it more presentable and easy to use on all types of screens.	
	0	5-15	20	/ 20
Marking Comments				
			Total Marks	/ 100
